Alma

NETWORK STREAMLINING THERAPY ACCESS

Alma is a membership based network for mental health care providers that aims to improve access to high-quality, affordable mental health care. Its platform enables providers to accept insurance and also provides a member directory, client- matching service, scheduling, and billing functions.

www.helloalma.com >

Calm

MENTAL WELLNESS, MEDITATION & SLEEP APP

Calm is a popular meditation and mindfulness app designed to help users reduce stress, improve sleep, and enhance overall well-being. Offering guided meditations, sleep stories, breathing exercises, and relaxing music, Calm caters to both beginners and experienced practitioners, providing a personalized, accessible approach to mental wellness.

www.calm.com >

KINTSUGI

VOICE BIOMARKER SOFTWARE

Kintsugi is a novel voice biomarker software that detects signs of depression and anxiety from short clips of free form speech using machine learning and natural language processing. Kintsugi's technology is used by healthcare providers, insurance companies, and employers to identify and prioritize mental health care needs.

www.kintsugihhealth.com >

pasito

EMPLOYEE WELLNESS BENEFITS

Pasito is the AI-native workspace for group health, life, and retirement benefits, structuring unstructured insurance and benefits data and powering agentic workflows across the benefits lifecycle.

www.pasito.ai >

unobravo

TELEHEALTH & PSYCHOLOGY

UnoBravo is a SaaS-enabled marketplace leveraging an innovative matching algorithm to connect psychotherapists and patients for online mental health visits. The company currently services Italy and Spain.

www.unobravo.com >

Workit Health

ADDICTION TREATMENT

Workit is an end-to-end virtual solution for addiction treatment and medication management, including Opioid Use Disorder and Alcohol Use Disorder. The company provides interactive therapeutic content and professional counseling services online.

Care Provision Tech & AI 1/3

[Return to Market Map >](#)

apricot

AI-POWERED HOME HEALTH DOCUMENTATION

Apricot is an AI-native, SOC2 compliant documentation platform for home healthcare providers that automates the highly manual, time-consuming and regulated process of documenting home health visits. Its conversational, nurse-driven platform transforms spoken or written inputs into compliant, structured clinical documentation while flagging missing or inconsistent details. Reducing paperwork time by up to 85%, it improves accuracy, compliance, and efficiency and freeing up more time for patient care.

www.apricothealth.ai >

SENIOR LIVING REFERRAL SERVICE

The platform provides an insight-driven and personalized experience to support family caregivers in navigating the complex process of finding the appropriate care.

www.aplaceformom.com >

SOCIAL CARE COORDINATION PLATFORM

Blooming Health is an AI-powered engagement platform that helps healthcare and community organizations connect with older adults and underserved populations. It automates multilingual outreach through text, voice, and email to deliver reminders, surveys, and wellness check-ins. The platform streamlines communication, tracks social-determinant needs, and ensures more people receive timely support and care.

www.gobloominghealth.com >

MEDICAL IMAGING ANALYTICS

Covera Health is a provider of analytics-based programs that is using electronic health record (EHR) data to reduce medical misdiagnoses and improve quality of care. The company's platform also provides tools to help providers and payers implement quality improvement interventions.

www.coverahealth.com >

AI WORKFLOW TOOL FOR POST-ACUTE CARE

ExaCare AI provides AI-driven software tailored for post-acute and senior care facilities. The platform automates and accelerates the admissions process by ingesting referral documents, extracting clinical and financial signals, and offering real-time recommendations for optimal patient placement. The platform aims to streamline operations, reduce administrative burden, and improve outcomes in skilled nursing and home care settings.

www.exacare.com >

VIRTUAL PHYSICAL THERAPY

Force Therapeutics is a healthcare technology company that develops digital care management platforms for musculoskeletal (MSK) conditions. It delivers efficient care to patients through digital navigation, virtual rehabilitation, outcomes collection and analytics.

www.forcetherapeutics.com >

Care Provision Tech & AI 2/3

[Return to Market Map >](#)

DIGITAL-ONLY AUTISM CLINIC

Forta is increasing access to dependable quality care by combining the latest advances in AI with novel, compassionate care models that are evidence-driven to create breakthrough outcomes for patients. Forta's autism spectrum disorder (ASD) therapy platform is currently being used in Forta's family-powered applied behavior analysis (ABA) therapy to help hundreds of children and their families.

www.fortahealth.com >

AI-POWERED SURGICAL PLANNING

Idoven is a health technology company that develops AI-powered tools and services to detect heart abnormalities at early stage and transform how cardiac diagnosis and care are delivered. The company's mission is to prevent cardiovascular disease by providing faster, more accurate, and consistent diagnoses and better targeted treatments for every patient.

www.idoven.ai >

CARE INTELLIGENCE PLATFORM FOR SENIOR LIVING INDUSTRY

Inspiren is a health-tech company offering a fully integrated, AI-powered ecosystem for senior living communities that brings together care planning, workforce optimization, resident safety and emergency response in a single platform. Using sensors, computer-vision and analytics, it provides real-time insights that help care teams anticipate resident needs, reduce falls and optimize staffing and billing.

www.inspiren.com >

DENTAL AI X-RAYS

Overjet is an FDA-cleared Dental AI tool to analyze patient x-ray data to provide an unbiased diagnosis and treatment plan proposal. The software is designed to be used by dentists to improve the accuracy and efficiency of their diagnosis and treatment planning as well as dental insurance companies to assess the severity of dental conditions and make decisions about coverage.

www.overjet.ai >

AI-POWERED PATHOLOGY PLATFORM

Pictor Labs is an AI-driven company specializing in digital pathology. They focus on transforming traditional histopathology with their innovative AI-powered virtual staining technology. This technology eliminates the need for chemical reagents traditionally used in tissue sample staining, drastically reducing the time needed for results.

www.pictorlabs.ai >

MAMMOGRAM IMAGING DETECTION

ScreenPoint develops Deep Learning and image analysis technology for automated reading of mammograms to enhance accuracy and efficiency of breast cancer screening. The software helps radiologists identify potential cancer lesions and prioritize which require further investigation, reducing unnecessary breast biopsies.

www.screenpoint-medical.com >

Care Provision Tech & AI 3/3

[Return to Market Map >](#)

theator

AI POWERED SURGERY TRAINING

Theator is a personalized video platform powered by Visual AI that enables coaching and training for surgeons. The product identifies improvement areas based on real-life visual inputs to improve individual surgeon performance and enforce best practices.

www.theator.io >

tytocare™

REMOTE MEDICAL EXAMINATION SOLUTION

TytoCare provides digital diagnostics for primary care, combining a proprietary diagnostic device with software to connect patients to remote clinicians. With the Tytocare device, patients can conduct at-home medical exams with the real-time, remote guidance of a healthcare provider.

www.tytocare.com >

viewfi

ORTHOPEDICS TELEHEALTH

ViewFi provides an intuitive, seamless, and supportive platform to simplify access to orthopedic care. Through viewfi, patients can connect with surgeons in a virtual appointment to discuss medical history, x-rays and other imaging while receiving diagnosis, a treatment plan and follow ups.

www.viewfi.com >

viz.ai

AI-POWERED CARE COORDINATION PLATFORM

Viz.ai revolutionizes pharmaceutical engagement by leveraging real-time patient data and advanced AI to activate patients and clinicians at the point of care, enhancing treatment journeys and outcomes. With a vast network of over 45,000 healthcare professionals in 1,500+ hospitals, covering 230 million lives, Viz offers 30+ disease-specific care pathways and 12 FDA-approved algorithms. Purpose-built for rapid provider engagement, 90% of Viz notifications are reviewed within 5 minutes.

www.viz.ai >

Healthcare Ops, Infra, Data & Networks 1/2

[Return to Market Map >](#)

Bamboo Health

HEALTH INFORMATION EXCHANGE PROVIDER

Bamboo Health is a behavioral health care coordination network and collaboration software enabling data, analytics, and communication solutions to reduce costs and improve outcomes. The platform has been shown to reduce hospital readmissions, improve patient satisfaction, and lower costs.

www.bamboohhealth.com >

briya

DECENTRALIZED DATA EXCHANGE

Briya is a longitudinal healthcare data exchange marketplace providing a queryable interface for biopharma and research institutions to access previously siloed provider data for Real World Evidence use cases. The company's platform allows healthcare organizations to share data with each other, patients, and researchers to accelerate medical research.

www.briya.com >

CentralReach

EHR FOR APPLIED BEHAVIORAL ANALYSIS

CentralReach is the EHR and practice management solution for clinicians focused on applied behavioral analysis, multi-specialty, occupational therapy, speech therapy, and PK-12. CentralReach is the only end-to-end solution in the market that integrates clinical data collection, practice management, and a marketplace product for these audiences.

www.centralreach.com >

Clarify

REAL-TIME HEALTHCARE INSIGHTS PROVIDER

Clarify Health Solutions develops analytics and software solutions that enable health systems to deliver satisfying and higher value care. The platform uses machine learning and artificial intelligence to analyze electronic health records (EHRs) and other data sources to identify patterns and trends that can help healthcare professionals make better decisions.

www.clarifyhealth.com >

element5

HOMECARE & HOSPICE AUTOMATION

Element5 provides automation-as-a-service solutions to homecare, hospice and senior living providers (post-acute care). The technology is built on the foundation of artificial intelligence and robotic process automation and delivers end-to-end automation for key repetitive workflows.

www.e5.ai >

ELLKAY

DATA INTEROPERABILITY

Ellkay is the leading healthcare data connectivity platform providing the "plumbing" across tens of thousands of labs, hospitals, clinics, and payors across the US. The product allows for improved efficiency of laboratory operations and to improved the quality of patient care.

www.ellkay.com >

Healthcare Ops, Infra, Data & Networks 2/2

[Return to Market Map >](#)

QUALITY HEALTHCARE SERVICES FOR SELF-FUNDED EMPLOYERS

Employer Direct Healthcare (EDH) is a healthcare services company focusing on providing high-quality and cost-efficient solutions for self-funded employers and their employees. They specialize in transforming access to excellent care, emphasizing the importance of guiding members through their healthcare journey and recovery.

www.edhc.com >

HEALTHCARE DATA ANALYTICS

Inovalon is a data aggregation, integration, analytics, and business process player serving a wide range of healthcare end-clients (pharma companies, payers, healthcare providers, and life sciences corporations).

www.inovalon.com >

HOSPITAL & CLINIC OPERATIONAL PERFORMANCE OPTIMIZATION

LeanTaaS is an advanced data science solution that significantly improves the operational performance of hospital and clinics. The company's platform uses predictive analytics and machine learning to help hospitals and infusion centers improve patient access, decrease wait times, and reduce healthcare delivery costs.

www.leantaas.com >

E-PRESCRIBING PLATFORM

Parachute Health is an ePrescribing platform for medical equipment, supplies and services. The company's platform allows healthcare providers to order medical equipment and supplies directly from suppliers, without having to fax or call in orders, improving efficiency in ordering and delivery, and reducing costs.

www.parachutehealth.com >

PRIOR AUTHORIZATION AUTOMATION

Rhyme provides the API infrastructure to automate medical prior authorization so patients get timely care. The company's platform allows healthcare providers to request prior authorization for medical services and medications from payers, without having to fax or call in requests.

www.getrhyme.com >

CENTRALIZED VALIDATION PLATFORM

Sware is a Computer Systems Validation platform automating the process of testing, validating, and qualifying any systems touching sensitive data in healthcare and Life Sciences to ensure compliance.

www.sware.com >

Life Sciences: Platforms & Software 1/3

[Return to Market Map >](#)

ENTERPRISE AI FOR PHARMA COMPANIES

Aily Labs specializes in developing AI-powered digital products that are designed to be both aesthetically appealing and easy to integrate into businesses. They focus on leveraging AI to enhance business operations, emphasizing the creation of meaningful and efficient AI solutions. Aily Labs offers products that are user-friendly and tailored to meet the specific needs of businesses looking to integrate advanced AI technologies into their processes. Their current client pipeline and solution expertise is targeted at pharmaceutical clients.

www.ailylabs.com >

MANUFACTURING NETWORK

Apprentice is an all-in-one manufacturing solution for life sciences to enable data to be shared instantly across teams. The manufacturing execution system (MES) helps life science manufacturers get therapeutics to patients faster by providing a unified view of the manufacturing process, from preclinical to commercial manufacturing.

www.apprentice.io >

DIGITAL HEALTH PRODUCTS

BrightInsight provides a pre-regulated data platform that allows Pharma and Medtech companies to host and deploy their digital health solutions in a compliant and reliable way. The company's platform accelerates time to market for digital health offerings across a variety of digital products and therapeutic areas.

www.brightinsight.com >

FINANCIAL PLANNING FOR CLINICAL TRIALS

Condor is a cloud-based financial planning and management platform purpose-built for clinical trial finance that unifies clinical, operational, and financial data to automate accruals, budgeting, forecasting, and scenario planning for biopharma and biotech companies. It integrates directly with ERP, CTMS and other enterprise systems to help finance, accounting, and clinical operations teams gain real-time insights, improve forecast accuracy, and streamline workflows that are traditionally managed with manual spreadsheets.

www.condorsoftware.com >

AI TO AUTOMATE CHEMISTRY & MANUFACTURING OF MOLECULES

Chemify is an AI-powered platform digitizing chemistry to enable the design, optimization and manufacture of novel small molecules and materials on demand. The company's mission is to radically accelerate drug discovery, materials innovation and chemical synthesis by offering a "design-make-test-analyse" loop that is far faster, more reproducible and scalable than traditional chemistry workflows.

www.chemify.io >

STREAMLINE CLINICAL TRIAL SITE WORKFLOW

Florence Healthcare provides software to streamline clinical trial site workflows and remote connect sponsors, CROs, and sites for access, monitoring, management, and SDR/V. They bring sponsor-site collaboration to life by freeing clinical trials from bottlenecks so they can accelerate and scale.

www.florencehc.com >

Life Sciences: Platforms & Software 2/3

[Return to Market Map >](#)

CLINICAL TRIAL OPTIMIZATION

Leal is a clinical trial optimization and recruitment platform. It provides a two-sided platform leveraging AI to provide cancer patients with a treatment decision-support tool and biopharma with actionable insights for clinical trial optimization & analytics.

www.leal.health >

PROTEOMICS PLATFORM

NanoMosaic is a next generation targeted proteomics platform powered by nanoneedles on a chip. The nanoneedle-based protein detection and quantification system can be used to analyze proteins in a variety of samples, including serum, plasma, tissue, and cells.

www.nanomosaicllc.com >

CLINICAL TRIAL OPTIMIZATION & PLANNING SOFTWARE

PhaseV uses advanced AI and machine learning to make clinical trials faster and smarter. Its platform helps drug developers and research organizations design better studies, monitor progress in real time, and uncover patient subgroups that may respond differently to treatments. By using data-driven simulations and real-world evidence, PhaseV aims to reduce trial costs, and shorten timelines.

www.phasevtrials.com >

DIGITAL PATHOLOGY PLATFORM

Proscia delivers an enterprise digital pathology platform that transforms laboratory workflows into a unified, data-driven environment. Its AI-powered Concentriq platform enables faster diagnostics, scalable research, and precision medicine by unlocking insights from pathology data across clinical and life sciences organizations.

www.proscia.com >

COMPLIANCE MANAGEMENT

Qualifyze is a digital platform specializing in audit management for pharmaceutical and chemical companies. Qualifyze simplifies the process of scheduling, managing, and sharing audit reports by providing a centralized hub for supplier audits.

www.qualifyze.com >

SCIENTIFIC DATA MONITORING & MANAGEMENT

TetraScience provides hardware and software solutions to monitor and manage research experiments in the cloud. The platform connects all lab instruments, informatics software, and data apps to provide researchers with a single source of truth for their data.

www.tetrascience.com >

Life Sciences: Platforms & Software 3/3

[Return to Market Map >](#)

AI POWERED VIRTUAL PATIENT MODELS

Unlearn.AI is a healthcare company that uses AI to develop virtual patient models for clinical trials. These models can be used to predict how patients will respond to treatments, allowing for more efficient and effective clinical trials, and improved patient matching.

www.unlearn.ai >

VIRTUAL ENGAGEMENT PLATFORM

Within3 is a cloud-based virtual engagement platform designed for healthcare organizations. The platform enables healthcare professionals to connect and collaborate securely online, improving communication and collaboration across healthcare teams. Within3 allows users to participate in virtual meetings, share information and insights, communicate securely, and collaborate on patient cases in real-time.

www.within3.com >

Life Sciences: Therapeutics 1/3

[Return to Market Map >](#)

ARREPATH

ANTI-INFECTIVE DRUG DISCOVERY

ArrePath is a biotechnology company that is developing new classes of antibiotics to address antimicrobial resistance (AMR). The platform uses machine learning and imaging technologies to identify compounds with new and unexploited mechanisms of action to develop antibiotics that are effective against drug-resistant bacteria.

www.arrepath.com >

Autobahn

LIFE SCIENCES THERAPEUTICS

Autobahn is a biotechnology company developing a portfolio of neuropsychiatric and neuroimmunologic clinical candidates leveraging its brain-targeting chemistry platform.

www.autobahntx.com >

RNA SOLUTION FOR ACUTE THROMBOLYSIS

Basking Biosciences is at the forefront of revolutionizing thrombolytic therapy, introducing a groundbreaking RNA aptamer technology for treating acute thrombosis. Their lead product, BB-031, targets von Willebrand Factor, offering a novel approach in clot resolution. Accompanied by BB-025 for swift neutralization, they ensure safety and efficacy. treatment.

www.baskingbiosciences.com >

CAPACITY^{BIO}

ADVANCED MITOPHAGY PLATFORM

Capacity Bio is a comprehensive and advanced mitophagy therapeutics and development platform for the purpose of restoring mitochondria quality control to treat neurodegenerative diseases and muscular disorders.

www.capacitybio.com >

MANUFACTURING TECHNOLOGIES

Cirsium Biosciences is producing next-generation plant-based viral vectors for gene therapy. The company's platform uses whole plants as the production platform for developing the next generation of viral vector manufacturing technologies, enabling clients to address current issues with cost, capacity, scalability and speed for the production of gene therapies.

www.cirsiumbio.com >

NEXT GENERATION IMMUNOTHERAPEUTICS

DEM Bio is a biotechnology company that is developing small molecule therapeutics that target the DEM pathway. The company is pioneering the next generation of immunotherapeutics designed to unleash macrophages and other myeloid effector cells to eliminate tumors.

www.dembioharma.com >

Life Sciences: Therapeutics 2/3

[Return to Market Map >](#)

LIFE SCIENCE THERAPEUTICS

Exsilio Therapeutics is developing genomic medicines that can be delivered in lipid nanoparticles to durably and safely treat a broad range of diseases, including genetic diseases, cancer, and autoimmune conditions.

www.exsiliotx.com >

CELL ENGINEERING

Gameto performs cell engineering to develop novel therapeutics targeted at reproductive health. The platform uses induced pluripotent stem cells (iPSCs) to generate ovarian cell lines that mimic the functions of reproductive system cells. This can be used to develop new treatments for infertility, menopause, and other conditions that affect women's reproductive health.

www.gametogen.com >

ALLOGENEIC CELLULAR MEDICINES

ImmuneBridge is a next generation of allogeneic cellular medicines to make curative cancer therapies. The expansion technology amplifies cord blood-derived immune stem cells while maintaining full immune multipotency to create a diverse, consistent and abundant cellular source for immunotherapies.

www.immunebridge.com >

ADVANCED T CELL ENGINEERING

Kyverna is a cell therapy company that is developing a new class of curative living medicines for inflammatory and autoimmune diseases. The platform is leveraging advanced T cell engineering to target the underpinnings of autoimmunity.

www.kyvernatx.com >

AI-FIRST PROTEIN DESIGN PLATFORM

Profluent is an AI-first protein engineering company. Their solution generates novel functional proteins in the space of genome editing. Profluent uses its generative models to engineer "protein alternatives" that are functionally equivalent to existing proteins, but divergent to not be covered by any existing IP.

www.profluent.bio >

TRANSFORMING THE SPEED AND ACCURACY OF DRUG CREATION

Superluminal Medicines is a generative biology and chemistry company revolutionizing the speed and accuracy of how small molecule medicines are created. Their platform aims to create candidate-ready compounds with unprecedented speed using a combination of deep biology and chemistry expertise, machine learning, and proprietary big data infrastructure.

www.superluminalrx.com >

Life Sciences: Therapeutics 3/3

[Return to Market Map >](#)

NEXT-GEN RNAI THERAPIES

Switch Therapeutics is a cell selective RNA therapeutics company aiming for gene knock down therapies in central nervous system (CNS) disorders.

www.switchthera.com >

VECTORIZED ANTIBODIES FOR NEURODEGENERATIVE DISEASES

VectorY Therapeutics is dedicated to creating transformative therapies for neurodegenerative diseases. Their mission centers on developing vectorized antibodies, aiming to significantly improve the lives of those affected by conditions such as ALS.
